EVERY COURSE, EVERY PRICE

What it costs to learn AI in Udaipur.

Four things, one page of prices. A ninety-minute introduction at ₹199, a private class for a business from ₹10,000, a four-week class for students at ₹3,000, and an advanced engineering programme from ₹30,000.

INTRODUCTION SESSION

₹199 · 90 minutes

BUSINESS AI EXPERT CLASS

From ₹10,000 · by headcount

AI ENTREPRENEURSHIP CLASS

₹3,000 · 4 weeks · weekends

ADVANCED AI ENGINEERING

From ₹30,000 · 3–6 months

NEXT SESSION

Sunday 15 November 2026, 11:00 AM IST

PREPARED

10 November 2026

All fees in INR. Prices current at the date above. udaipurai.in

01 Every price on one page

FEES

No enquiry form stands between you and a number. Corporate training is the only thing priced by scope, and the bands for that are printed below too.

PROGRAMME	LENGTH	FEE
AI Introduction Session Open to anyone	90 minutes	**₹199**
Business AI Expert Class Small and medium businesses, corporate teams and organisations in Udaipur and across Rajasthan.	Half day to two days, by scope	**From ₹10,000** priced by how many people are in the room
AI Entrepreneurship Class College students, final-year students, freshers and early-career professionals in and around Udaipur.	4 weeks · 4–8 sessions	**₹3,000** introductory price for Batch 01 · ₹3,500 from Batch 02
Advanced AI Engineering Program People who want to build AI products and services properly: developers, serious freelancers, and graduates of the entrepreneurship class who want to go further.	3 months intensive, or 6 months extended	**From ₹30,000** paid monthly · ₹10,000 × 3, or ₹6,000–₹8,000 × 6

> **The ₹199 introduction session is a demo class, not a programme.** It is ninety minutes, open to anyone, and exists so you can judge the teaching before paying for anything longer.

02 The introduction session

₹199

AI Introduction Session — ₹199

Ninety minutes on what AI actually does, with live demos and no jargon. Bring the job you repeat every week and you will leave knowing which parts of it AI can take — and which parts it should not.

How it runs

You register	Anyone can come — students, freelancers, owners, managers. No prior AI experience and no company email needed.
We send a questionnaire	Six optional questions about the tasks you repeat every week. It takes four minutes and it shapes the examples we use.
We build the session around the answers	The demos come from what the room actually said, so the examples are real work rather than a sample dataset.
You leave with a shortlist	Three things worth automating in your own week, in order, with a monthly run cost against each. No obligation to buy anything.

What you leave with

- A ranked shortlist of what to automate first in your business
- A monthly run cost estimate for each one
- The prompt pack for your sector
- A live demo built on your own workflow

Next session. Sunday 15 November 2026, 11:00 AM IST · 90 minutes · 40 seats · Live online, or in person in Udaipur.

03 The three programmes

3 PROGRAMMES

Business AI Expert Class

FOR BUSINESSES · OUR MAIN WORK

A private, customised AI training built around one business and its actual operational problems. We send a questionnaire first, then design the session around the answers — your enquiries, your quotations, your follow-ups, your systems.

OPTION	FEE	NOTE
Up to 15 participants	**₹10,000**	A single team or department
16 – 40 participants	**₹20,000 – ₹30,000**	Depends on duration and how much customisation
More than 40	**Custom**	Multi-department, multi-session, quoted after the call

Who it is for. Small and medium businesses, corporate teams and organisations in Udaipur and across Rajasthan.

What you need first. A sponsor who can decide, and a team willing to try something differently next week.

What it covers

Discovery	A questionnaire plus a short call: what your team repeats, what breaks, where the hours go
Session 1 — Foundations in context	How these tools behave, taught entirely through examples from your sector
Session 2 — Your workflows	Live demos on your enquiries, quotations, reports, follow-ups and content
Session 3 — Hands on	Your team builds, with us in the room. Everyone ships one thing before they leave
Handover	Prompt pack for your business, the ranked shortlist, and the run-cost estimate

What you leave with

- A prompt pack written for your business
- Working examples on your own processes
- A ranked automation shortlist with costs
- An explicit "do not automate" list

Who should not take it

- Companies wanting a one-hour motivational AI talk for the whole office
- Teams with nobody willing to own the change afterwards — we will say so during discovery
- Organisations that want headcount reduction as the headline; that is rarely where the return is

AI Entrepreneurship Class

FOR STUDENTS & BEGINNERS

Four weeks of weekends that take you from never having used AI properly to having built and shipped something with it. Aimed at students and beginners who want to make things, not just pass a course.

Who it is for. College students, final-year students, freshers and early-career professionals in and around Udaipur.

What you need first. A laptop and four weekends. No coding, no prior AI experience.

What it covers

Week 1 — How these things actually work	Models, prompts, why the same question gives two different answers, and the frame that fixes it
Week 2 — Build your own assistant	A custom GPT or Gem trained on material you choose, with guardrails
Week 3 — Make things worth looking at	Image, short video and voice. The production pipeline, and how to price the output
Week 4 — Ship it	Automate one real task, publish your project, and present it to the batch

What you leave with

- A working AI tool you built
- A published project with your name on it
- A visual asset pack
- A completion certificate

Who should not take it

- People who already build with AI — go straight to the Advanced Program
- Anyone who cannot give it four weekends; the project is the point and it is cumulative
- Businesses wanting their team trained — that is the Business AI Expert Class

Advanced AI Engineering Program

THE DEEP ONE

Three to six months of weekends that take you from using AI to building with it — custom tools, automations, AI video and content systems, and the judgement to know when a thing is actually working.

OPTION	FEE	NOTE
3 months · intensive	**₹30,000**	₹10,000 × 3 months · faster pace, same curriculum
6 months · extended	**₹36,000**	₹6,000 × 6 months · more practice time
6 months · with mentoring	**₹48,000**	₹8,000 × 6 months · added project support and 1:1 mentoring

Who it is for. People who want to build AI products and services properly: developers, serious freelancers, and graduates of the entrepreneurship class who want to go further.

What you need first. The entrepreneurship class or equivalent experience. Comfort with computers; coding helps but is not required for every track.

What it covers

Month 1 — Foundations that hold	How models behave, context engineering, prompting that survives a model change
Month 2 — Build	Custom assistants, grounding on real data, tool use, and the first deployed project
Month 3 — Automate	Production workflows, error handling, logging, cost control, and what breaks at volume
Month 4 — Generate	AI video and content systems: image, motion, voice, and a repeatable production pipeline
Month 5 — Make it real	Evals, quality measurement, and shipping something to actual users
Month 6 — Sell it	Portfolio, pricing, proposals, and the capstone review

What you leave with

- A deployed AI tool with real users
- Production automations with monitoring
- An AI video and content pipeline
- A portfolio and a capstone defended in review

Who should not take it

- Complete beginners — start with the AI Entrepreneurship Class
- Anyone who cannot commit weekends for three months straight
- People looking for a certificate without the shipped work behind it

04 Who teaches all of it

Purvansh Parmar

BUILDER IN RESIDENCE · AI ENGINEERING & SEO

Founder of Food Never Comes. Ships AI products end to end and runs the SEO that brings them traffic — the rare combination of someone who can build the system and then make the internet notice it.

- Building AI tools that actually run
- Automating the work that repeats every week
- Getting found on Google and inside AI answers
- Knowing what it will cost before you commit

Burhan

BUSINESS LEAD · B2B & CORPORATE ROLLOUTS

Runs the business side of Udaipur AI. Spends his week inside other people's companies working out which processes are worth automating and which are not, then leads the rollout that follows.

- Working out which jobs are worth handing to AI
- What works in hotels, coaching, export and clinics
- Pricing AI work and writing the proposal
- Getting a team to actually change how it works

The two of us teach every session ourselves. No rotating bench of freelance trainers and no guest slot — the people in the room are the people doing this work the rest of the week, which is the only reason the examples are real ones.

05 Questions people actually ask

What do you actually sell?

Four things. A 90-minute introduction for ₹199, open to anyone. A private class for one business, from ₹10,000. A four-week class for students at ₹3,000. And an advanced programme from ₹30,000. The benchmark test is free.

Why does the 90-minute session cost ₹199?

Because free seats get booked and skipped. ₹199 is less than lunch, and it is there so the room is full of people who actually turned up. If the fee is the real obstacle, message us and we will put you in anyway.

How much is the student class?

₹3,000 for four weeks of weekend sessions — the introductory price for the first batch. It goes to ₹3,500 after that. You finish with a working project and a certificate.

What does training for my team cost?

₹10,000 for up to 15 people. ₹20,000 to ₹30,000 for 16 to 40. Above that we quote after a call. The price moves with the size and the scope, nothing else.

I am not technical at all. Can I still do this?

Yes. Nothing in the introduction or the business class needs code, and most people in the room have never written any. Just bring one real task — a reply, a report, a quotation.

Start with the ₹199 session

Ninety minutes, open to anyone, no background needed. If it is not useful you have lost ₹199 and an evening.
